

# ANC™

Integration is about uniting individuals (people, companies, countries) into a larger group that is focused on a shared objective.

That's what happens when companies integrate their supply chains: they form connections with their suppliers that enable them to work together more efficiently. Each member of the group benefits by receiving information that is more accurate and is delivered more quickly.

## **Making the Connection**

The source of some of these benefits and the “glue” that holds the connections together, is a Value-Added Network (“VAN”), such as our ANC™ software.

ANC™ is an affordable communication transmission service that can transfer data from anywhere, to anywhere. It operates almost like a package delivery service: it routes messages to the appropriate applications, tracks them while they are enroute, and acknowledges once they have arrived. It also transfers them securely, to ensure that the content of your messages is protected.

## **Implemented in the Cloud**

The software is implemented as a cloud-based service, so there is no software that needs to be installed or maintained. This also allows us to leverage the capabilities and expertise of our network support staff. Our team monitors the network on a 24 x 7 basis. Our support team are experts at isolating and correcting issues. The software is scalable to meet the needs of any business: as network traffic grows, our support team can easily spin up additional servers to accommodate the load.

## ANC™ Features & Benefits

- Cloud-based implementation
- Private network
- Monitored 24 x 7
- Scalable to fit any enterprise
- Supports all common file types, including flat file, .csv, XML, and fixed format
- Fast, secure, and accurate data transfer
- Ability to exchange messages with outside networks
- Fully integrated with any ETL software or translator, including Simplicit™ ETL
- No software to install or maintain
- Constant monitoring ensures maximum availability
- Able to rapidly scale as traffic grows

## Private Membership

ANC™ is what's known as a "private network," which means that the only members are our customers and their trading partners. This provides two major benefits. The first is that it enhances security by limiting the number of users on the network. The second is that limiting the number of users also helps to limit network traffic, which keeps costs lower and helps speed throughput.

Just because the network is private doesn't mean that the applications on it cannot exchange data with applications on other networks. ANC™ can route files to and receive files from other networks. It can also manage any type of file, including flat file, .csv, XML and fixed format.

## Integrating the Pieces

ANC™ is integrated with any ETL software or any translator, which includes our SimpliCIT™ ETL. Customers who have purchased SimpliCIT™ ETL have the option of leveraging this integration for quick and accurate network transfers. Implemented together, the solutions combine seamless data integration with fast and accurate data transfer, allowing you and your partners to realize the benefits of being totally Acclimated.

### About Acclimate

*Acclimate specializes in helping companies get integrated, get automated and get empowered.*

*Our SimpliCIT™ ETL Electronic "Data Interchange (EDI) software and ANC™ Value-Added Network platform combine rules-based integrations with fast and reliable data transfer to provide seamless communication across your value-chain.*

*Our Process Automation and Custom Development services eliminate bottlenecks and redundancies in your processes, capture the data needed to effectively manage them, and deliver automated solutions optimized for throughput and quality.*

*Our Empowerment solutions transform your data into actionable information that enables you to manage your processes effectively and empowers your employees to make real-time decisions.*

*If you would like to know more, contact us at (937) 684-9004 or visit our website at [www.acclimate.com](http://www.acclimate.com). We welcome the opportunity to help you get Acclimated.*
