

SimplicIT™ ETL

There are lots of great reasons to integrate your supply chain. It improves your ability to forecast demand, control inventory levels, view lead times, manage your organization, reconcile invoices, fulfill orders and track shipments. Achieving this goal takes effort. To do it right, you need to interface with source systems up and down your supply chain, so that you have a comprehensive, real-time view of how your process is performing.

Finding a Common Language

Interfacing with multiple systems is like talking to people in foreign countries; you need a common language in order to communicate. With applications, that means transforming data from one system into a format that other systems can recognize.

Developing these interfaces on your own can be an expensive, time-consuming process, especially if you have a large number of customers and suppliers. That's why we developed SimplicIT™ ETL. SimplicIT™ ETL can be implemented in the cloud or installed locally on your private network. It translates data from one application into formats other applications can understand. SimplicIT™ ETL works with any business system, whether it is an "off-the-shelf" ERP or your own custom code. It can scale to meet the needs of your operation, regardless of size or complexity.

Making Integration Simple

At the heart of this tool is an engine that defines the specifications for each of these translations. These specs are maintained by our Implementation Specialists, our experts in EDI and data management who work with you to create integrations that are specific to your applications.

SimplicIT™ Features & Benefits

- Flexible Installation
 - Acclimate Cloud
 - Customer Cloud
 - Virtual Private Server
- Supports all common file types, including flat file, .csv, XML, and fixed format
- Supports all EDI documents
- Pre-built integration with multiple ERP systems
- Works with any business system and value-added network
- Support monitoring capability for all installations, cloud-based or on-premise options

Designed for Flexibility

SimplicIT™ ETL has several built-in features that provide flexibility and ease of use. It can accept data from any source: Files can be sent and received in any format your partners require, including flat file, .csv, XML, and fixed format. It has built-in support for all of the standard EDI document formats. It has pre-built integrations with document formats. It has pre-built integrations with multiple ERP systems. Its fully integrated with our ANC Value-Added Network, which provides seamless communication between you and your trading partners.

Designed for Flexibility

SimplicIT™ ETL can be installed locally on your private network, or it can be a cloud-based option regardless of location. With the cloud-based solution, there is no software for you to install or maintain. Our Implementation Specialists will work with you to understand your requirements, build your specs and workflow, and onboard your trading partners. Once your workflow moves into production, our support team monitors your workflow to ensure that it is running smoothly. They can also modify your requirements, when necessary, as well as assist with onboarding additional trading partners.

The Acclimate Advantage

The term “acclimate” means to adapt to new environments. SimplicIT™ ETL enables you to “acclimate” with your value chain. You get the benefit of seamless integration with your customers and suppliers without the cost and effort to build your own custom interfaces. Consider the Acclimate advantage because we know your data matters.

About Acclimate

Acclimate specializes in helping companies get integrated, get automated and get empowered.

Our SimplicIT™ ETL Electronic “Data Interchange (EDI) software and ANC™ Value-Added Network platform combine rules-based integrations with fast and reliable data transfer to provide seamless communication across your value-chain.

Our Process Automation and Custom Development services eliminate bottlenecks and redundancies in your processes, capture the data needed to effectively manage them, and deliver automated solutions optimized for throughput and quality.

Our Empowerment solutions transform your data into actionable information that enables you to manage your processes effectively and empowers your employees to make real-time decisions.

If you would like to know more, contact us at (937) 684-9004 or visit our website at www.acclimate.com. We welcome the opportunity to help you get Acclimated.
